

BEFORE: Adult Clubfoot Deformity  
Previous surgery as child but incomplete  
Correction. With rigid deformity and severe  
bone deformity.

BEFORE: Rigid deformity of the Foot and  
Ankle. Chronic Pain from Walking on the balls  
of the foot, was never able to touch heel to the  
ground.

From: Dr. Kevin Lam of Family Foot and Leg Center

It was our pleasure to work with Project HOPE as well as fortunate to have the cooperation and support of HMA Hospital Systems and their wonderful staff in this difficult but rewarding reconstructive case.

AFTER reconstructive soft tissue and bone  
surgery of the ankle and lower leg.

Finally able to wear sneakers and walk without pain in the  
foot and leg. Procedures: Ankle Fusion, Z plasty of  
Achilles and posterior leg skin. Ilizarov Technique for  
gradual soft tissue lengthening and bone fusion / manipu-  
lation.
